

*Caucus for Fair Trade! Sample 2008 Resolution:*

**We Support:** a new, fair trade model that puts workers, family farmers, consumers and the environment ahead of corporate profits. That model should:

- a. Ensure that corporations cannot challenge local, state and federal public interest policies or health and safety regulations;
- b. Allow for more transparency in trade negotiations and a greater role for the democratically elected Congress in trade deals; and
- c. Address the massive US trade deficit to restore a balance that works for working people.
